**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17 and 28-29, drawn to a combustor with film cooling, classified in class 60, subclass 755.
  - II. Claims 18-27, drawn to a can combustor, classified in class 60, subclass 39.37.
  - III. Claims 30-33, drawn to a method of combustion including film cooling, classified in class 60, subclass 772.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus as claimed can be used without the film cooling as claimed.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a combustor made of ceramic material not necessitating the film cooling as claimed. See MPEP § 806.05(d).

Art Unit: 3746

4. Because I and III together, and invention II are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Applicant is required to elected for examination at this time either inventions I and III together, or invention II alone.

5. This application encompasses two species of the inventive subject matter, as for example, the species of Figures 2A and 2B, respectively. Pursuant to 35 USC §121, applicant is required for a complete response to (1) elect a single disclosed species, and (2) list all claims readable on the elected species including and any claims subsequently added (MPEP 809.02 (a)).

Applicant is further advised that a mere argument alleging that a generic claim exists or is allowable will not satisfy a species election requirement. For a complete response, applicant must elect a single species and list the claims readable on that species as set forth above.

6. Note that the species election has to be consonant with the invention species. In other words, the elected invention and its claims must read on the elected species. In addition, Applicant is required to list the claims of the elected invention that read on said species, and to provide a bottom-line summary of which claims read on both the elected species and the elected invention.

Art Unit: 3746

7. A telephone call was made to Michael Shimokaji on 6/6/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ehud Gartenberg whose telephone number is 571 272 4828. The examiner can normally be reached on Monday-Thursday.
